

THEY WERE VERY UNHAPPY WATCHING HIS VISION AND NATIONAL PROGRAMS OF GOOD AND STABLE GOVERNMENT THEN BEING SEEN UNFOLDING BEFORE THEM IN THE DAILY LIVES OF THE ITALIAN PEOPLE

WAR LORDS AND THEIR MANY WARS

Who are these men who travel to the far ends of the earth to meet in secret rooms and conceive and execute special and far reaching agendas in concealed documents which in due course will affect the lives, fortunes and destiny of millions of global citizens their families and their children? Are they Americans? Are they English? Are they Israelis? Are they Europeans? Are they Asians? Regardless of what their passports show and state they are none of the above: They are Internationalists

In the years 1922 to 1939, Benito Mussolini and the Fascist Government's social, economic, religious, and cultural programs became a hallmark of new universal governmental standards, of national progress, pride and achievements not only for the Kingdom of Italy but were soon to be adopted by several other world governments. The world stood in awe at the outstanding achievements of this "young man" from Italy and beat a path to his doorstep. The political concept of Fascism is a product of the Italian people, Mussolini was often heard to say and often to write. He neither sought to export it and refused to make unnecessary trips outside of Italy, unless he was invited to do so due to important international matters. If people of other countries wish to know what Fascism is and what it does, let them watch what we do in Italy — they will then learn all they wish to know. In certain countries, and in certain spheres of financial and fraternal influence, powerful men were ill at ease watching and taking note of the recent national and international successes of Italy's Fascist Government. They saw that their social and financial models were now being seen as second-rate and in serious need of new blood and new thinking on their behalf. The western capitalist countries of the world found themselves deeply entrenched in a soul searing, intractable Economic Depression, ever since the capital market crash of 1929. They gathered in their government offices, their private hunting lodges, and their ceremonial meeting rooms to consider what their economic options were in the light of the ongoing multifaceted intellectual brilliance and leadership of this political "boy genius" Benito Mussolini. They were very unhappy watching his vision and national programs of good and stable government then being seen unfolding before them in the daily lives of the Italian people. Their war drums were unsheathed and tuned in preparation of a repeat performance of the 1914-1918 World War I fiasco, which cost the nations of Europe and the World ten million dead and twenty million wounded men, women and children.
